

Curcumin 95%

Our wide range of Curcumin 95% has been proven to be the best for problems related to gastric and colon cancer. These are processed with high quality of ingredients with accurate composition. We follow strict quality control system to avoid any inaccuracy in the formulations.

Advantages:

- Inhibits growth of Helicobacter pylori cag A+ strains (Group 1 carcinogen and are associated with gastric and colon cancer).
- Increases mucus content in gastric juices and prevents histamine induced gastric ulceration.
- Inhibits lipoxygenase and cyclooxygenase properties of human platelets.
- Prevents increase in serum glutamic oxalactic transaminase and glutamic pyruvic transaminase seen in inflammation.
